The existing facility contains an electrical substation which serves the Marina and associated facilities. The need to keep the existing facilities and public conveniences in use throughout the new build period has influenced our decision making for the project. The new building will be phased to allow the existing facilities to be kept open until the new facility is handed over. The existing facility will then be demolished and the final bay of the new building which will enclose the Electrical substation, bin store, and baby change unit will be completed. The works to the car park will then be completed.
